Commissioner Named in London to Serve in a Suit.

An order was granted to-day by Jus tice Fitzsimons, of the City Court authorizing the Consul-General of the authorizing the Consul-General of the United States at London to take, as commissioner, the testimony of Augustin Daly, John Farrington, Treasurer of Mr. Daly's London theatre, and John T. Brown, Assistant Treasurer, as well as that of Edward Hinton, electrician.

The evidence thus obtained is to be used in the suit brought some time ago in the City Court by Samuel B. Van Ranst, who was employed by Mr. Daly to superintend the construction of the electrical appliances when his London theatre was being built. Ranst sues to recover \$30, which he claims to be due him upon the con-tract. Mr. Daly claims to have paid Van Ranst in full.

The croaker was a mighty poor prophet for "The Evening World" and its friends, of whom Max Mergentime is not the least and Phil Peters, Jake Hamburger, the Bahrenburg Brothers, George Washington Lynch, Marks Schlessinger, Young Jake Hamburger and a host of others are giant examples, has fed 206,000 and morenot one meal each, but for three days

up by hustling their share in the work of feeding those who were without food was good advice. There are no croakers on the list of those who have made "The Evening World" Free Food Commission the most stupendous success of this season of charity.

Think of it; the biggest organized charity of New York would boast like a veritable Jack Falstaff if it had spent the secretary, treasurer, superintenden; sp. 55.00 in a year for charity, salaries of the secretary, treasurer, superintenden; and agents included, and the commission merchants, marketmen, fruiterers, grocers and fish dealers and cash contributing readers of "The Evening World" have enabled the Free Food Commission to distribute that amount in food to 220,000 people in less than four weeks—at less than wholesale prices at that.

less than who essie prices at that.

Rev. F. A. Slyfield, of the Camp Memorial Church, in Chrystie street—the church where Major-Gen. 7. O. Howard conducts a bible class—looking on at the destitution said:

"Too much cannot be said of the grand work being done here by the readers and friends of "The Evening World.

"It is a pity that more people who can afford to give aid to their helpiess fellow-men do not visit 90 Murray street and see for themselves the gigantic proportions of this work. I had at least fifteen people in my congregation Sunday who got help here Saturday, and in every case there was absolute distress and starvation for families of from four to seven children.

"I know, for I carefully investigated each case myself, and I have been told a half doasn times within a week that but for the food received from 'The Evening World' Free Food Commis-

sion the speaker and his or her family must have perished from hunger."

The venerable 8. Howland, who says jocosely that he retired from the ministry twenty years ago, but has been "acting pastor" ever since, came down from the Forty-fourth Street Methodist Episcopal Church in response to the invitation of "The Evening World" to clergymen to visit 99 Murray street.

"It is a magnificent work The Evening World is doing here," said the aged clergyman. "It sets a good example to others, and the commission merchants—they are noble men: men to be proud of; men who, joving God, show it by their works."

TAMMANY'S "CHARITY."

Here's the Truth About That Fund

'I'll tell you one thing, sir. Tammany did something that hasn't been much heard about. Before I left New York we had raised \$100,000 for the poor, and the Second District alone furnished 600 f coal." assertion at first caused amuse

The assertion at first caused amusement and then indignation on account of the bold misstatement of facts. Here in New York it is well known that the hardened Tammany leaders took advantage of the hard times to make political capital by posing as philanthropists. They collected more than \$100.000 in the natice of the poor, but the poor who benefited were all good Tammanyles. Now and then a worthy family's distress was relieved, but they happened to have Tammany affiliations, and, as a matter of fact, all the good that "Tammany did" and "that hasn't been much heard about" was for Tammany, and Tammany ien't boasting when it has "a good-thing" for fear that it may be spoiled by too much praise.

FIGHT THE SOFT-COAL BILL. Health Board Will Denounce It to the Legislature.

Henry Steinert, counsel to the Health Department, said to-day that the Health Board, at its meeting to-morrow would pass a resolution denouncing the bill now before the Senate in the interest of those

who use soft coal. A copy of the resolution will be sent to the Legislature, and if it is deemed accessary representatives of the Health Department will go to the State capital. "I hardly think the latter course will be necessary," added Mr. Steinert, "for the exposure in The Evening World of the real intent of the bill has been the means of killing its chances becoming a law. Undsubtedly, had nothing been said, the bill would have been rushed through and on the statute books before its real meaning was known."

Senator Childs, of Queens County, introduced the bill into the Senate. It takes the power of enforcing the smoke nuisance in this city out of the hands of the Health Department by repealing all laws conflicting with the proposed law. As a matter of course, the section in the Sanitary Code, under the provisions of which the officials of the New York Steam Company were arrested for maintaining a nuisance, would be rendered invalid. A copy of the resolution will be sent

March 6 and 9 Mr. Dunn declares that there is nothing but fair weather in sight. A point in Mr. Dunn's favor is that De Voe's prophecy that the snow-storm was to begin to-day was evidently based on misinformation, as was also his declaration more than a week ago that the cold wave would continue until the first of this week.

It was warm from the Ohio Valley East this morning, and in this city the thermometer registered 53 degrees at 8 o'clock, and during the forenoon it climbed up at a rate of nearly 3 degrees an hour. A year ago to-day fur-lined overcoats were in demand because of a temperature at 8 o'clock of 23 degrees.

There is nothing on Mr. Dunn's map to indicate the approach of a storm, and while it will probably get a little cooler, the prospects are for pleasant weather.

Lost His Love in the Blissard. To the Editor: Can you inform me how I can win back the girl that left me? The way it happened was this. There was to be a reception in a town about eight miles from here and I promised to take her. My intentions were good, but on the day of the affair it began to snow and blow, and was a reg-ular blizzard. I did not think it a fit night for young lady to be out, so I wrote her to that

A Good Word for the Tramp. So much is said on the fruitful subject of tramps' ingratitude, their laziness and insolence, that it may be interesting to hear testimony on the other side, which has, so far, remained entirely silent. A benevolent woman lives in a Hudson River town that sees many of this gentry, as there is work there on the ice in the Winter and among the farmers in the Summer, while, as it is a river town, it is in direct line of foot travel all the year around, being on the State highway. Since the crasof '73 introduced these persons to public notice, she has never turned one away hungry, though she has never given one of them money. She is in formed that her house is known to the fraternity all over the State. And she has never seen one who did not seem any young lady to be out, so I wrote her to that I didn't willing to pay for his meal with work. Intend to take her from the first. > In the Coming By and By. Ten years hence women will all wear tailor-made dresses out of doors; the material will be cloth, jeans, duck or cotton cheviot, such as men use for blouses, Summer suits and vesting; the cut will be severe and the colors as neutral as in masculine attire. It has taken a decade to retire silk dresses, white petticoats and jewelry. To-day indies and women of the world are as quietly arrayed for a walk or a journey as their husbands and brothers. Ten years from now sewing machines will e of no domestic use; there will be women and children's clothing stores with every garment of every size, style, and price, on sale. In 1904 there will be fitting rooms in every first-class drygoods store where corsets and under-garments will be tried on and as perfectly fitted as gloves, boots and millinery goods.

To Make a Thin Neck Plump. Daisy.-Bathe neck and bust in warm

water to be followed by cold water and friction. Rub with a coarse towel. At night apply to the neck cocoa butter and lanoline or the lanoline plain. You can buy a cake of the cocoa for ten cents, and a box of lanoline for twenty-five. This feeds the skin. A course of cod liver oil would help your neck. An excellent method to improve a thin neck is to wear the gowns cut low. High neck dresses ruin the plumpness of the throat. It is for this reason that so many wor sleep in Summer in low cut night robes

Here Is a New Hatpin.

A new hatrpin has been invented. Its merit is that when once placed in a hat it will stay there and cannot be lost. "It does away with the constant making of new holes in a hat, and thus contributing to its quick wear at one or two points. There is a shoulder on the pin near the point, and a celluloid disk resting against this shoulder prevents the pin from coming out of the hat after it has been once inserted in it.

First Woman Physician in Turkey. Miss Mary Eddy is the first woman admitted to the practice of medicine in Turkey. She was born in Syria twentyfive years ago, and is the daughter of the Rev. Dr. W. W. Eddy, a missionary at Beirut. She is a graduate of the University of the State of New York, and was a registered surgeon and physician in New York City. She passed her examination in the Medical Military School board of thirteen physicians, mostly Pashas of high rank. Miss Eddy was pareful not to be admitted by special avor, in order that her admission be a test case and open the way for
